EXPERIENCE

iVedha - City National Bank (Contract)

Senior Software Engineer / Observability Engineer

Sept 2023 - Present

- Led the automation of infrastructure, configuration and deployment processes using Monaco, Terraform, Ansible, Azure DevOps, and Github Action pipelines. This initiative reduced manual onboarding and deployment process, ensured consistent configurations, and accelerated deployment cycles by 40%.
- Optimized observability and implemented scalable incident response workflows by integrating ELK, PagerDuty, LogicMonitor, and Dynatrace across distributed systems. Enabled proactive alerting, reduced mean time to resolution (MTTR) by 35%, and improved service uptime through on-call rotations automation.
- Built a robust workload automation ecosystem utilizing Apache Airflow and Stonebranch on Kubernetes (AKS), enabling secure, audit-compliant remote and batch job execution. Developed modular DAGs and streamlined job scheduling for cross-platform dependencies, resulting in a 50% increase in operational efficiency.
- Streamlined ITSM operations by implementing automated workflows and enhancing observability intake via custom ServiceNow integrations and dynamic form automations. Achieved a 70% reduction in manual ticket routing and significantly improved the onboarding experience through automated scripting solutions
- Designed and implemented internal SRE portal solutions leveraging TypeScript, React, and Python to enable comprehensive SLT reporting and streamlined evidence collection aligned with internal controls and OCC compliance requirements. Managed application deployment on Azure Kubernetes Service (AKS) using Helm charts and integrated Azure Key Vault to ensure secure, centralized secret management.

:Different

Senior Software Engineer

Aug 2021 - Jul 2023

- Successfully migrated the platform users to an NPP-enabled payment provider, resulting in a significant reduction in payment turnaround times from two weeks to just a few days.
- Launched a bank reconciliation product that automated the processing of inbound transactions from multiple parties, leading to a 75% decrease in the time spent reconciling transactions and a 2.5% reduction in manual errors.
- Built the core trust account system and ledgers from scratch, ensuring accurate audit trails and statements that comply with REINSW standards.
- Worked closely with the Platform/DevOps team to develop Terraform scripts, enabling efficient provisioning and management of the required infrastructure.
- Collaborated closely with the Engineering Manager/Architect to design and implement infrastructure enhancements and other technical implementations, fostering a robust and scalable environment.

Atera Technologies

Software Engineer

Mar 2020 - Aug 2021

- Developed and maintained SaaS products to streamline the recruitment process for enterprises.
- Built an end-to-end product for classifying documents and extracting important entities using NER.
- Extracted Entities from the texts of the documents with an overall accuracy of more than 84%.

EDUCATION

University of Westminster

MS Advance Software Engineering

Jan 2021 - Jul 2023

Buckinghamshire New University

B.Comp. Software Engineering

Aug 2019 - Aug 2020

CERTIFICATIONS
